

TestPharmacyManagement.Pharmacy  
ManagementTest.SellProductTestAdmin

TestPharmacyManagement.Pharmacy  
ManagementTest.SellProductTestInexistentID

PharmacyManagementDLL.Proxy  
ActionManager.SellProduct

```
graph LR; A[TestPharmacyManagement.PharmacyManagementTest.SellProductTestAdmin] --> C[PharmacyManagementDLL.ProxyActionManager.SellProduct]; B[TestPharmacyManagement.PharmacyManagementTest.SellProductTestInexistentID] --> C;
```

The diagram illustrates a dependency or mapping between two test classes on the left and a single proxy action manager on the right. The top test class, 'TestPharmacyManagement.PharmacyManagementTest.SellProductTestAdmin', and the bottom test class, 'TestPharmacyManagement.PharmacyManagementTest.SellProductTestInexistentID', both have arrows pointing to the 'PharmacyManagementDLL.ProxyActionManager.SellProduct' component. The target component is shaded gray, while the test classes are white with black borders.
